1. INSERTING YOUR DESIGNS

- Layers called "OBJECT NAME" (REPLACE) are elements which you can use to put your own designs. It is done via "smart object" function.
- Simply double click on smart object icon  and you will be directed into the new .psb document.
- Then put your logo/artwork on existing layer or make new ones.
- when done simply save this .psb document and you can go back to main file, your artwork should be waiting for you.
