

CARS v1

About the Author

Jakub Przybolewski

Ever since I remember, graphic has been my passion. I was interested in drawing cars as a child. When I grew up creating automotive objects in 3d space became my biggest hobby. I started my romance with a CGI in 2004 after watching one of television programs called Animaster.

Nowadays I live in Silesia(Poland), working as freelancer in many graphic areas (3d modelling, post production, animation etc.) improving and expanding my experience all the time. I like photography, traveling and listening independent music.

Feel free to have a look at my portfolio:

CARS v1

Designed for visualizations

Middle polygon objects.

No spare polygons. Enough to look great, economic for your resources.

No displacements

Better stability, less ram consumption, faster rendering.

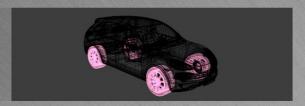

One element body

Every part is already attached to main body as one single object. Don't worry about separated elements that mess your scene.

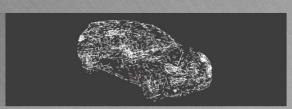

Wheels optimized for animation

Separated instance object wheels. Pivot centered.

Vray Proxy version available

No more attaching, double checking, converting. Just merge and go!

Clear object, materials and layer names.

Easily find and manipulate your model in large scenes.

Multiple car paints.

Don't like original color? Don't worry. Every car comes in multiple car paint color.

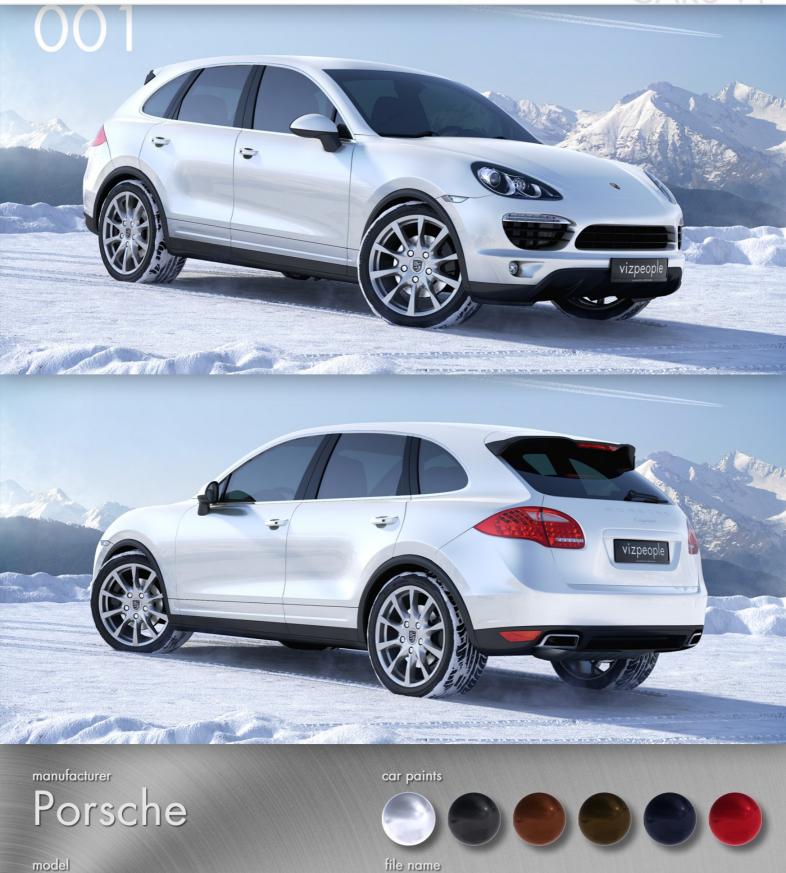

Made for LWF

From very begining all materials are prepared for Linear workflow.

Cayenne
